COMPILATION OF 92 FINAL AND IMPLEMENTATION STUDIES FOR THE PROJECT “BUILDING INTERVENTIONS AND EQUIPMENT SUPPLIES FOR THE FUNCTION AND ACCOMMODATION OF SCHOOL LIBRARIES” - GREECE

The objective of this project was the full study of the conversion of existing classrooms into school libraries in 92 designated schools across Greece, and was completed in three phases as follows:

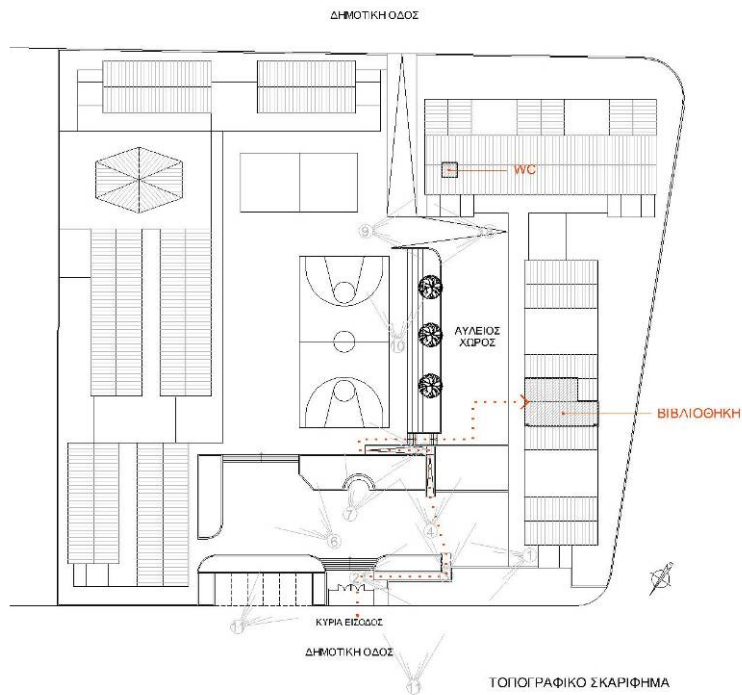

PHASE A: Visits of the study team, accompanied by teams of engineers employed by the Organization of School Buildings S.A., to all 92 selected school buildings, during which all the spaces and installations selected for intervention were recorded.

PHASE B: Records of the existing condition of each selected school building were imported into an electronic database.

PHASE C: Parallel to PHASE B, and under the supervision of the Organization of School Buildings S.A., all the required studies at the preliminary study level were compiled. Afterwards all the final studies were compiled, followed by the implementation studies and tender documents required for the completion and approval of the project by the assigning authority. More specifically, the studies that were required for the completion of the project were the following:

- Architectural studies - proposals for spatial and equipment layouts
- Surrounding area and landscaping studies
- Static studies (when deemed necessary)
- Electromechanical studies
- Fire safety and signage studies
- Analytical preliminary accounts of necessary works and compilation of the projected budget for the building and Electromechanical works
- Tender documents, one for each school library.
